

Healthy

Main effect of CS type

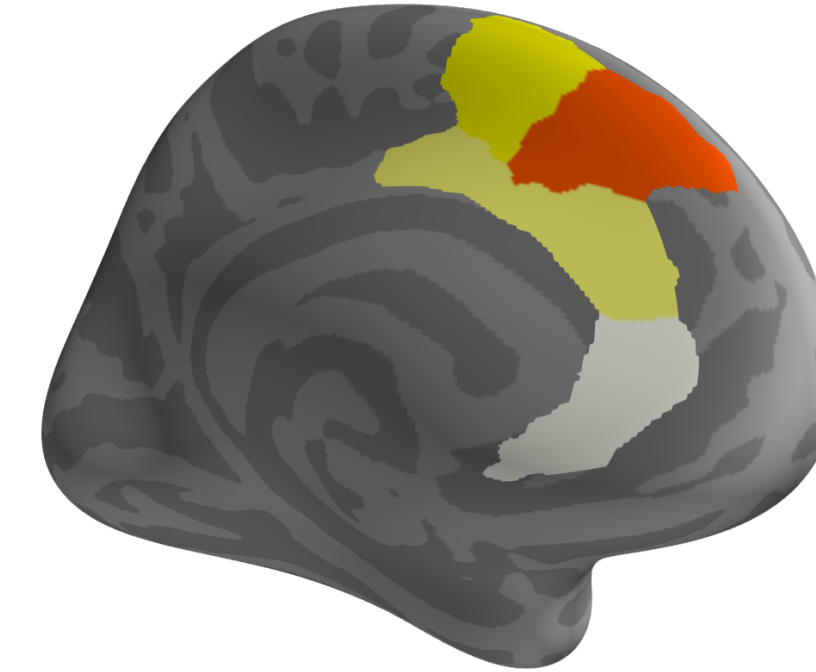

0.000 2.79 5.58 8.36 11.2 13.9 16.7 19.5

Values shown are
F-statistics
uncorrected $p < .05$

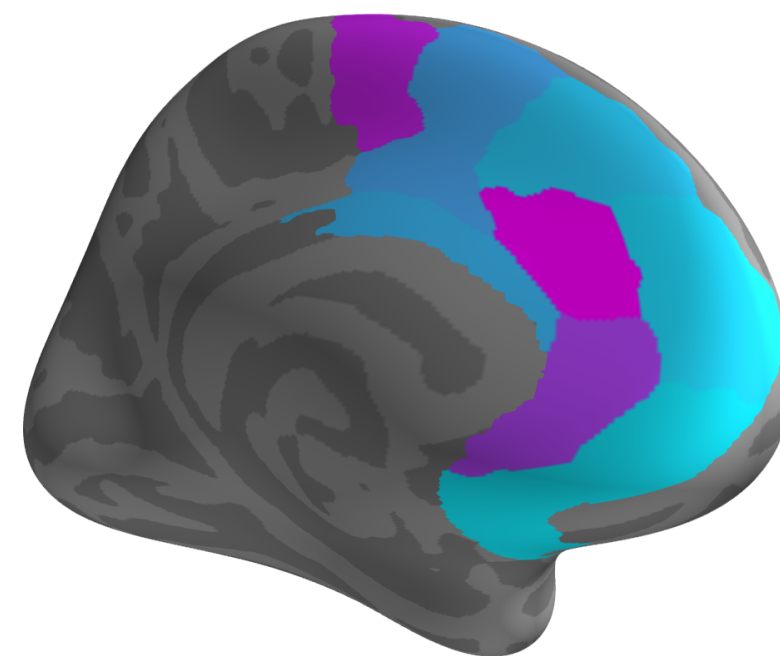

Healthy

Main effect of CS type

0.000 1.16 2.32 3.48 4.63 5.79 6.95 8.11

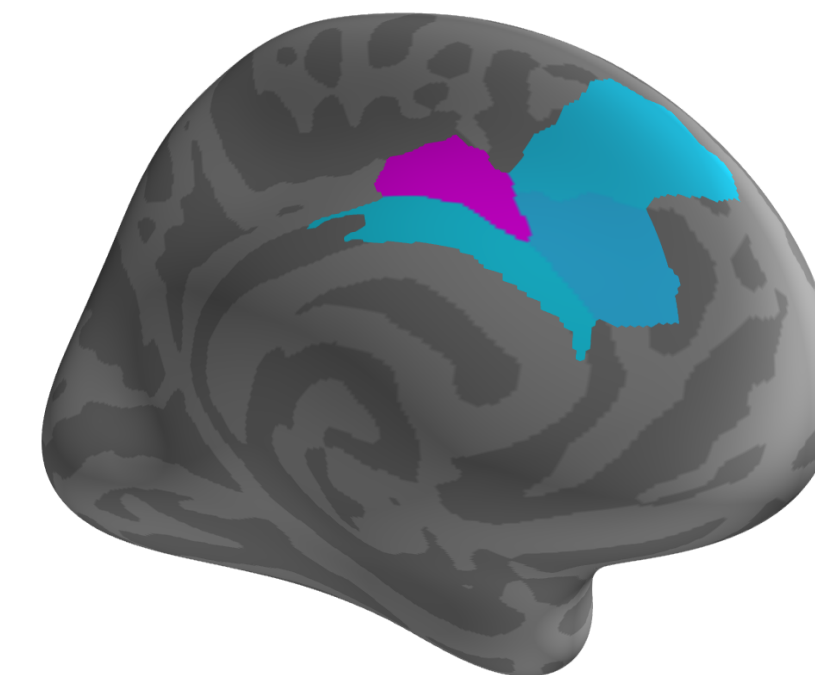

CS type X encoding phase interaction

0.000 13.3 26.7 40.0 53.3 66.7 80.0 93.4

No main effects
of encoding phase,
which is good, means that
we aren't observing ERS bias
between these two conditions

CS type X encoding phase interaction

0.000 4.75 9.51 14.3 19.0 23.8 28.5 33.3
